# 2016 - 4<sup>th</sup> Quarter Newsletter

## **Message From The President**

FAPMS recently completed a very successful annual conference in Daytona Beach October 17-20. Hurricane Matthew did his best to stop this from occurring and closed our original venue. However, thanks to the tireless work of President Angie Huebner and Local Arrangements Chairman Bill Torres, we were able to relocate to another venue and the conference went off without a hitch.

This year we celebrated 40 years of this amazing organization. In addition to the regular program, FAPMS honored its charter members, past presidents and reminisced about the past four decades. Keynote speaker Joe Joyce took us for a stroll down memory lane and reminded us where this organization came from. We were also able to hand out over \$8,000 in scholarships to help the next generation achieve their educational goals. It was great looking back at the last 40 years and we are excited at what lies ahead for the next 40.

If this industry is to survive the next 40 years, we are going to need an infusion of new blood in our industry. It is imperative that you reach out to friends who may be looking for a new profession. We are short of applicators at the present time, but there is plenty of work to be done.

I look forward to the next year as president of YOUR society and welcome any feedback you may have.

#### REVIEW OF THE 3RD QUARTER MINUTES

#### **MEETING CALLED TO ORDER 3:01**

Secretary Walters took roll and a quorum was declared

Review of 3rd qtr. minutes

Asked for any changes, omissions or deletions, no changes noted. Joyce Hertel made a motion to approve the 3<sup>rd</sup> qtr. minutes, Kelli Gladding seconded, the motion passed unanimously.

#### **CORRESPONDENCE**

Angie,

Thanks for calling me back to discuss FAPMS conference dates. As we discussed, FWC is finding it more and more difficult to manage aquatic plants and meet stakeholder desires. One of the more difficult and vocal stakeholder groups are the duck hunters. Many duck hunters have expressed their displeasure when aquatic plants are treated during the hunting season. There is an early duck season that lasts about a week around the end of September then it closes until mid-November. During the period when the season is closed we are trying to get some Hydrilla treatments completed and get floating plants under excellent control in hopes that we won't have to do much treating during the season which runs until the end of January. The FAPMS annual conference falls in October every year during this critical time when we need contractors out on the lakes. I would greatly appreciate it if the FAPMS Board of Directors (BOD) would have a discussion about possibly changing the dates of the annual conference. From the resource managers perspective it seems like January might be a good time. It would be after the holidays and usually this is the colder period of the year when invasive plant growth is at its lowest.

Thank you for your consideration and please extend my appreciation to the BOD for considering this request. If you have any questions or need additional information, please contact me.
